

A SIMPLE EXPLANATION OF SOFTBALL RULES

The game of softball is played by two teams; one out and the other in.

The one that's in sends players out, one at a time, to see if they can get in before they get out.

If they get out before they get in, they come in, but it doesn't count.

If they get in before they get out, it does count.

When the ones out get three outs from the ones that were in before they get in without being out, the team that's out comes in and the team in goes out to get those going in out before they get in without being out.

When both teams have been in and out seven times, the game is over.

The team with the most in without being out before coming in wins, unless the ones in are equal, in which case, the last ones in go out to get the ones in out before they get in without being out.

The game will end when each team has the same number of ins out, but one team has more in without being out before coming in.

Or something like that....
